TO: Minerals File

FROM: Lynn Kunzler, Reclamation Specialist 

RE: Site Inspection, Anderson Supply Company, Anderson Supply Mine,  
S/049/018, Utah County, Utah

Date of Inspection: March 8, 1996  
Time of Inspection: 9:30 a.m.  
Conditions: Cool, cloudy  
Participants: Lynn Kunzler, DOGM

Purpose of Inspection: To evaluate current conditions of site.

This site is not active at the current time, although there was evidence that vehicles had recently been driving around. However, the access to this site is somewhat blocked for vehicles. They have pushed some rocks out of the way where the access road does go into the site. There is a small stockpile of almost black colored clay material. There is slightly over an acre of disturbance that appears to be related to this site. There is probably another 2-3 acres that seem to be involved in historic slumping and sluffing and some of this slumping does look somewhat recent.

The file records indicate that this site was active in 1994. The annual report submitted for 1995 indicated the site was in suspension.
